

# DEHESA DE LUNA

FINCA RESERVA DE  
BIODIVERSIDAD

## PREMIERE

*Dehesa de Luna presents its new  
BIO Wines at Wine Paris.*

Paris, 11-13 February 2019

Discover their new labels and enjoy them with **EXTREM PURO  
EXTREMADURA**, premium Iberian ham. The ideal Food Pairing experience.

After some years in the market, Dehesa de Luna has obtained the **BIO Certificate** for the wines from vintage 2018 on. They have taken the opportunity to change the labels, so that they are now fresher and represent better what you will find inside and where the vines grow:

When you enter the Finca Reserva and dozens of rabbits and partridges cross your path, while birds of prey circle overhead with their impressive wings, you feel like you're entering a space that really is special. After 10 minutes, you will be able to make out the clear outline of a winery, where nothing is superfluous, destined on one hand to the preparation of top quality wines, following criteria of sustainability and efficiency.

On the other, however, the space is designed to integrate perfectly into the landscape, making your visit a 360° experience that integrates wine tourism and nature in its purest form.

Our wines do not belong to any of the most famous grape-growing areas on the planet. But a project and wines such as these that are starting to come to light would surely not have been possible in any other part of the world.
